SECRET SEEDS

Send the partner school an anonymous pack of seeds. Try to grow them in class and monitor them.

Pack and send in a blanc envelop some seeds typical for your country

Snailmail takes about three weeks between India and Europe.

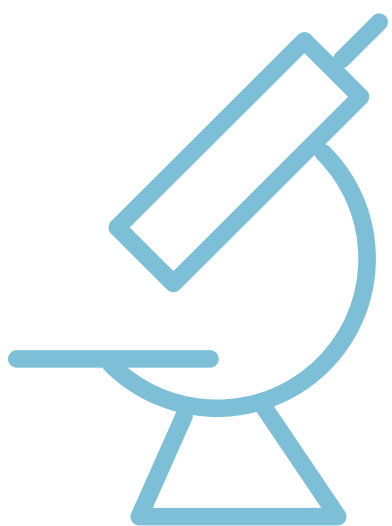

Plant the seeds in different trays

Decide with the class where to put them. Warm or cold? Lots of light or darker? You can also set up an experiment comparing the circumstances

Crop?

Try to predict the crop. What plants are typical for the partnercountry? Why do they grow them? Ask your peers.

Science/research

Depending the age group add a scientific component.

Broaden the project

Photosynthesis. drawing graphs of growth. How do plants drink?

Plant the seedlings in the schoolgarden

Or have the children take them home to grow them.
