

# Happy birthday

## Lets celebrate

- Teacher: have the children draw their birthday party
- The children can build their birthday party using different figures.
- Contrast and compare the drawings. Is special clothing required? Is special food served?
- Program your figures to talk about your birthday.
- Go to: <https://code.org/helloworld> Choose the "food" theme
- Swap urls. Does the party differ in the other country? How does it differ and what are the similarities

### Receive login access

Go to: The hour of code. <https://code.org/helloworld>

### Unplugged

To give your children an idea of what they will be doing digitally first instruct them to draw their birthday party with crayons

### Make your move

The children will create an animation of their birthday party writing short lines of text in English.

### Share the feeling

Collect all urls of digital birthdayparties with the names of the creators and swap it with the urls of the partnerschool. Have the children watch the party of their peers.

### Show you're moved

Teach the other group a happy birthday song in your own language

### Is everybody invited to the party?

Have a talk with the class about how to make everybody feel welcome. Is it important to know what to do? and what not to do?

### We're glad to have you onboard!

Try to put together a birthday calendar of the children in the partnerschool. Make birthday greeting cards to send when a child has his or her birthday.
