

Welcome to the party

Dance party

Teacher: Go to <https://code.org/dance> hoose unplugged.

Think of a series of body moves

Have the children understand what an "event" is. Downloadable recourses on the site

Practice an unplugged dance party

Program your sprite to make the same moves as the ones you made

Record while you dance the dance your partner created. Share the recording.

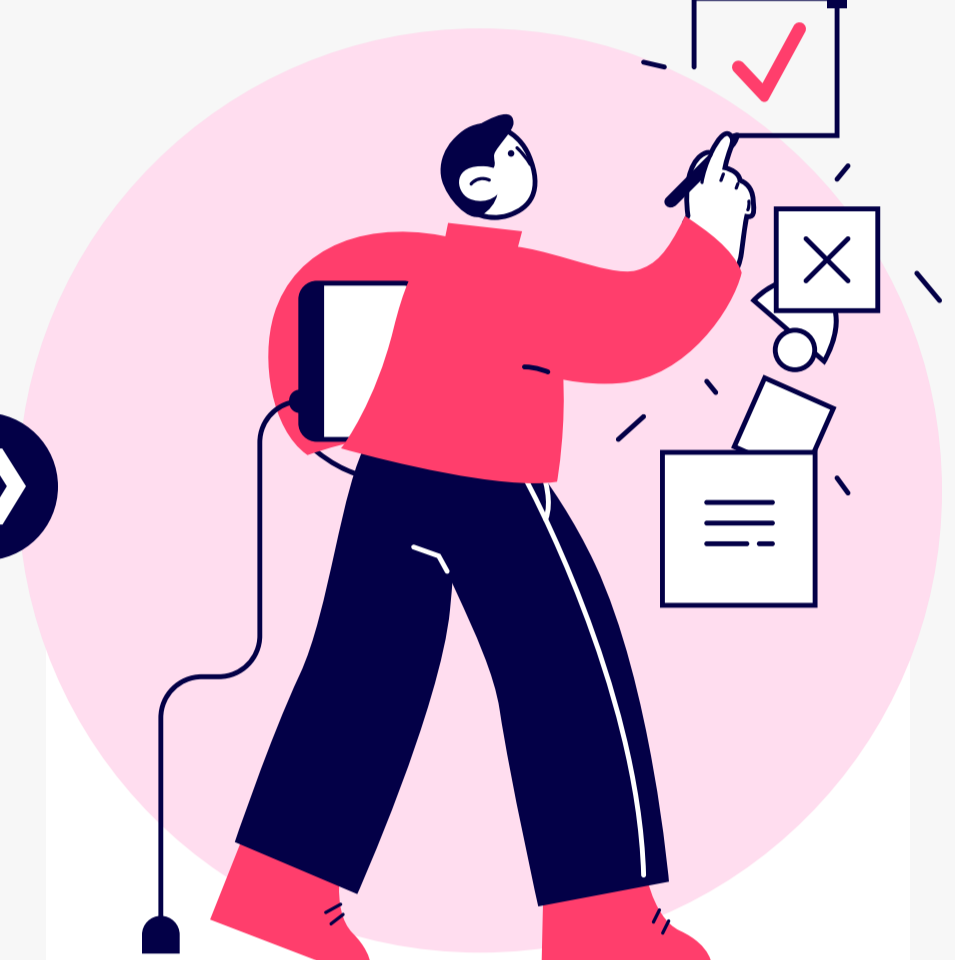

Receive login access

Go to: The hour of code. <https://code.org/dance>

Unplugged

To give your children an idea of what they will be doing digitally, first instruct them with the unplugged series: <https://curriculum.code.org/hoc/unplugged/4/>

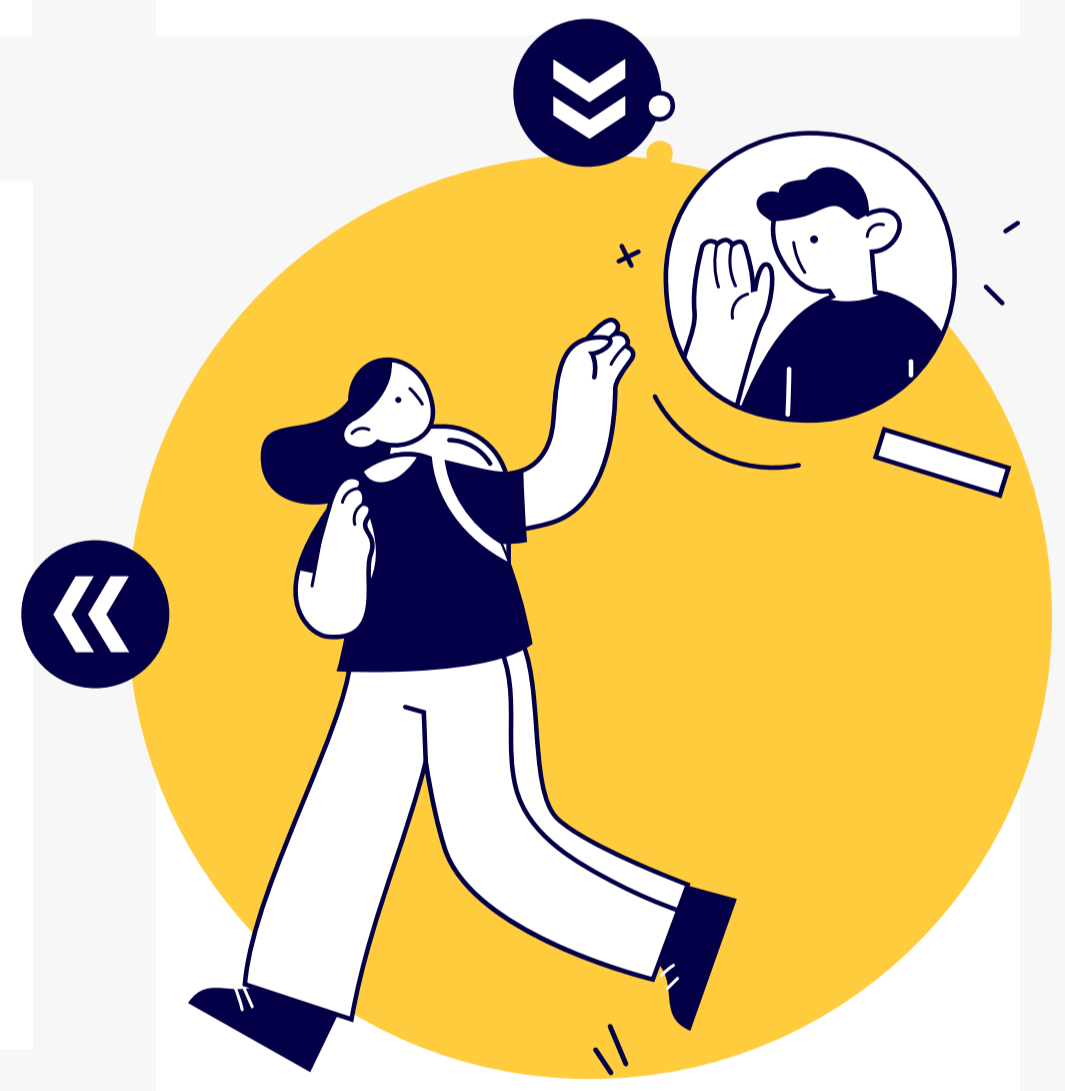

Make your move

Think of a nice dance to the music you select. Have your sprite make the moves you thought of. Make sure the events match the beat of the music. Save the file giving it your name+dance

Share the digital dance

Collect all urls of digital dances with the names of the creators and swap it with the urls of the partnerschool. Have the children watch the dance of their peers.

Show you're moved

It is super cool to see the partners make the dance moves designed for them in an online event. You can upgrade this challenge by adding lyrics of educational content: tables of 1-10 provinces and capitals etc

Unplug the dance

By watching the dance teach yourself the moves. Have your peer see how you dance. Is it correct?

We're glad to have you on board!

Have the partners give each other feedback on the dances. Can they come to another dance while working together combining the dances?
