

## WCA Challenge | Secret seeds

Send the partner school an anonymous pack of seeds. Try to grow them in class and monitor them.

**BRAINPORT  
EINDHOVEN**

### **Pack and send some seeds typical for your country**

Send the seeds in a blank envelope. Snail mail takes about three weeks between India and Europe.

### **Plant the seeds in indifferent trays**

Decide with the class where to put them. Warm or cold? Lots of light or darker? You can also setup an experiment comparing the circumstances

### **Crop?**

Try to predict the crop. What plants are typical for the partner country? Why do they grow them? Ask your peers.

### **Science/research**

Depending the age group add a scientific component.

### **Broaden the project**

Photosynthesis. drawing graphs of growth. How do plants drink?

### **Plant the seedlings in the school garden**

Or have the children take them home to grow them.
